

Simply, Conferencing

## Web Conferencing Solutions

---

Imagine visually presenting financial information, company updates or benefits plans to investors or employees without having anyone leave the office. From spur-of-the-moment meetings to that important Event call or training session, CentraCall's complete range of web conferencing solutions makes it easy to share information via the Internet with any size audience, anywhere, anytime.

### Microsoft® Live Meeting

With its flexible platform and configurable user interface, Microsoft Office Live Meeting can be optimised with the features that best fit the type of meeting you're conducting. From small, collaborative working sessions to large online presentations, Live Meeting makes it easy for you to present and for your participants to benefit from the web conference no matter what size the group. With features like audio controls, custom slides, reporting tools, recording options and print to PDF you can make Live Meeting the perfect match for any meeting. Use Live Meeting for company-wide events, project status meetings, product launches or even virtual sales presentations.

### WebEx™ MeetingCentre™

MeetingCentre, powered by WebEx, provides the ultimate collaborative platform for your day-to-day communication needs. Whether your daily business is conducted internally with colleagues or externally with customers and vendors, MeetingCentre provides the ideal online setting to do so effectively. Receive immediate feedback from your participants with the polling feature. Collect financials and review data easily through document sharing and file transfer. See who's talking via multipoint video conferencing. PowerPanels™ and the floating icon tray allow you to customise your view of the meeting and easily access the tools that you need. You can even control your Reservationless-Plus audio conference from within the MeetingCentre meeting interface so your attention remains focussed on your meeting rather than switching back and forth between your computer screen and your telephone keypad.
